[REDACTED]

**SYNOPSIS**

On May 10, 2018, [REDACTED] received an email from Amy Windrope, of the Washington State Department of Natural Resources (WA DNR) regarding the total amount of Atlantic Salmon caught and reported by civilians in Washington State and Canada.

**DETAILS**

On May 10, 2018, Amy Windrope, of the Washington State Department of Natural Resources (WA DNR) sent me an email regarding the total amount of Atlantic Salmon caught and reported by civilians in Washington State and Canada. Included in this email were two spreadsheets which contained the raw numbers of Atlantic Salmon caught and location where they were caught.

These numbers show that approximately 1,932 Atlantic Salmon were caught in Washington State and Canadian waters and reported to WA DNR. Some of the Atlantic Salmon were reported within rivers in Washington State, including the Skagit River near Baker Lake and other rivers such as the Skykomish, Puyallup and Snohomish.

This information is also available on the WA DNR website which has an interactive map.
